G-SERIES SMALL FRAMES

SMALL MACHINES. BIG RESULTS

DON'T LET THE SIZE FOOL YOU.

Whether you're acquiring your first machine or adding to a fleet, there's a John Deere G-Series Skid Steer or CTL that's all-in for you.

Entry-level models

Looking for a basic skid steer? The value-packed 312GR and 314G give you the choice of a radial- or vertical-lift boom. Equipped with manual controls and fuel-efficient diesels, they're easy to operate and own.

More power and options

If it's a more powerful, better-equipped machine you're seeking, step up to the 316GR and 318G. These larger-performance models also offer more options including joystick controls, air conditioning, and ride control, to list just a few.

Beast mode

Check the 317G CTL specs. Superior pushing power and breakout force deliver the tractive effort and leverage to dig in where other machines just spin.

Lightweight transport

With weights from only 5,995 to 8,195 lb., these compacts are easy to trailer behind a pickup truck.

Generous FT4 power

Smooth-running turbocharged 2.1-L EPA Final Tier 4 (FT4)/EU Stage IV diesels meet rigid emission standards and pack plenty of power and torque.

When smaller is smarter

Size up a G-Series. Wheel options enable them to slim down and fit through narrow openings.

Pick up the pace

Two-speed option in the 316GR and 318G provides faster transport speeds, to help boost productivity.

Dig, pry, push

Ample axle torque and increased boom and bucket breakout forces help carve out clay, push through piles, and keep the bucket heaped.

Tread lightly

Equipped with optional 15.8-in.-wide track, the 317G CTL's ground pressure is just 4.5 psi, letting you work in soft underfoot conditions. Helps increase side-slope stability, too. Ground pressure with standard 12.6-in.-wide track is only 5.5 psi.

Space commander

With widths at less than 72 in. with optional 15.8-in. track and just over 65 in. with standard 12.6-in. track, little gets in the way of the 317G CTL. Its small stature makes it easy to trailer, too.

NARROW MACHINE WIDTHS ENABLE EASY TRANSPORT BETWEEN JOBSITES

BOOM LIFT

RADIAL OR VERTICAL

This reimagined loader rises high, picks up heavy loads, and delivers remarkable boom- and bucket-breakout forces. Plus, a low center of gravity and superior balance provide exceptional agility and stability on slopes. Choose between vertical or new optional radial lift to match your application.

WHAT'S THE DIFFERENCE?

RADIAL LIFT

More reach at mid-range lift heights, good for digging, grading, and backfilling.

VERTICAL LIFT

More lift height and reach at the top of the lift path, for more stability.

Power lifter

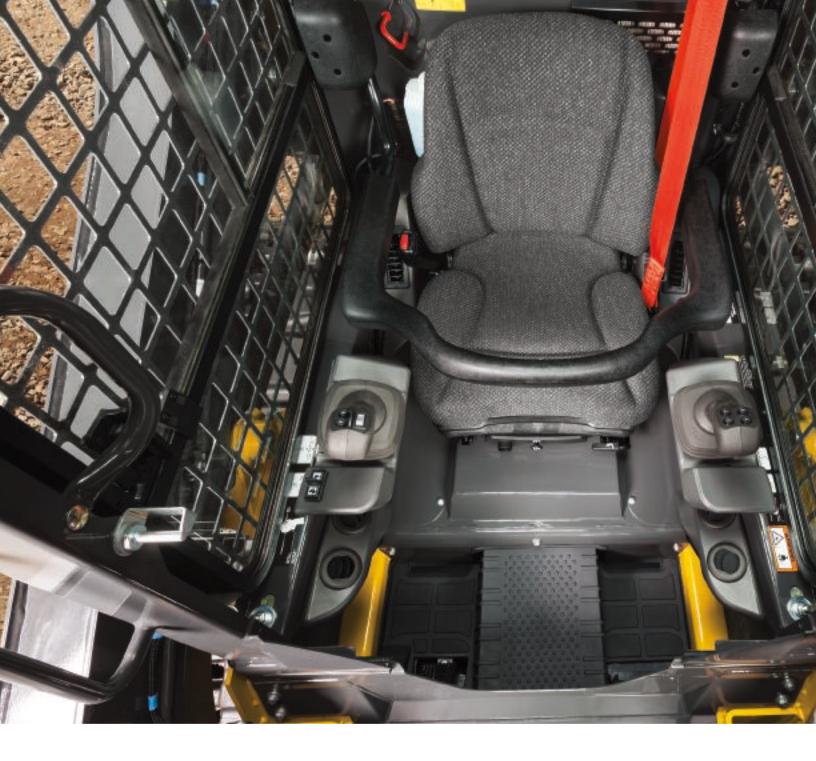

Redesigned vertical-lift boom rises to 10 ft. 1 in. Combined with a 2,125-lb. rated operating capacity, the 317G CTL precisely places pallets and carries big loads

Carry more, spill less

Boom design keeps the load close to the machine, for better stability. Low center of gravity, 30-deg. bucket rollback, optional hydraulic self-leveling, and optional ride control (317GR, 318G, and 317G CTL only) also help keep buckets full and forks loaded.

Boom-diggity

Radial-lift booms on the 312GR and 316GR provide powerful digging performance and generous lift height at a competitive price. For even more lifting ability, opt for the 314G, 318G, or 317G CTL. Their vertical-lift booms deliver outstanding lifting and truck-loading ability.

TAKE A LOAD OFF

ENHANCED ABILITY — AND COMFORT, TOO.

With our G-Series, compact doesn't mean cramped. Larger entryways with swing-out doors make it easier to get in, get comfortable, and get on with it. Inside, there's more productivity-enhancing foot- and legroom. The tightly sealed interior is quieter, too, so you can concentrate on the job at hand — and even enjoy the radio. Operators will also appreciate what they see from the comfortable sculpted seat. Clear sightlines to the cutting edge and bucket corners, above and below the lift arms, and the jobsite ahead and behind instill close-quarters' confidence.

Heads-up operation

Overhead panel conveniently places machine info on the left, control switches to the right. Easy-to-read LCD monitor provides a wealth of info and control — including vital operating conditions and advanced diagnostics

Push-button convenience

Optional sealed-switch module provides amenities such as keyless start and anti-theft settings, plus fingertip activation of numerous machine functions including optional ride control and hydraulic self-leveling.

Safety first

Like all John Deere machines, personalprotection features abound. In-cabactivated boom lock and triple-interlock operator-presence system help keep harm's way at bay.

Your controls, your way

Low-effort foot pedals are standard on skid steers; manual hand controls are available. Electrohydraulic (EH) joysticks are standard on the 317G CTL, optional on 316GR and 318G Skid Steers.

Four-season comfort

For year-round comfort, air conditioning is available in 316GR, 318G, and 317G CTL models.

Enhanced visibility

Optional LED light package with integrated side lighting (316GR, 318G, and 317G CTL only) provides unsurpassed all-round illumination.

Fatigue-beating ride

Adjustable high-back sculpted seat provides daylong comfort and support. For even more comfort, a heated airride seat is available on all models.

BIG-TIME UPTIME

MORE EFFICIENT IN EVERY WAY.

Incorporating many of the same durability and reliability features found on our larger machines, the G-Series is as tough as they come. Uptime advantages such as rugged Yanmar engines, sealed electrical connectors, O-ring face-seal hydraulic fittings, large coolers, and extended service intervals help keep downtime down. Plus, a standard automatic shutdown system prevents overheating or low fluids from ruining more than just your day. When you know how they're built, you'll run a Deere.

Heavy-duty drivetrains

Oil-bathed final-drive chains withstand daily punishment and never need adjustment. Beefed-up drive sprockets also deliver long-term durability.

Fewer refills

Refueling and other fluid additions are convenient and quick. Generous tank capacity and fuel-efficient diesels enable daylong operation, letting you accomplish more between fill-ups.

Big biceps

Large cross-section boom arms and heavy-duty upper links deliver the stamina to endure tough tasks, for long-term durability.

Chill out

Large coolers provide increased heat rejection for superior performance in severe, high-load conditions. Engine-mounted belt-driven cooling fan delivers efficient, reliable performance.

Anti-leak fittings

O-ring face-seal hydraulic fittings virtually eliminate aggravating and costly oil leaks.

Sealed connections

Switches and electrical connectors are sealed from moisture and dirt, to help resist corrosion.

Give yourself a brake

Spring-applied hydraulically released wetdisc park brakes never need adjustment, to help take the pressure off sure stops.

Bucket choices abound

Choose from rock, multipurpose, construction, utility, and tooth buckets in varying widths and capacities. New grading-heel bucket excels at back dragging.

Grab and go

Brush, scrap, and utility grapples employ two hydraulic-actuated dualaction tongs for superior retention of a wide variety of materials.

Snow attachments

Equipped with a snow blower, snow pusher, utility blade, or angle broom, the G-Series machines make quick work of clearing whatever winter drops your way.

Busybody

With go-everywhere rubber track undercarriage, universal Quik-Tatch, and auxiliary hydraulics, the 317G CTL is fully equipped to tackle a seemingly endless variety of tasks.

Roadwork made easy

Perfect for concrete or asphalt flatwork, our angle brooms, vibratory rollers, cold planers, hydraulic breakers, and wide variety of buckets let you hit the road running.

Landscape add-ons

Landscape and nursery options include rotary tillers, planetary augers, pallet forks, power rakes, landplanes, dozer blades, and roller levels, to list just a few.

Farm hands

For handling hay, cleaning pens, rebedding stalls, or numerous other agricultural chores, add utility grapples, material/manure scrapers, pallet forks, bale spears, and buckets to get it done.

WE SWEAT THE DETAILS

SO YOU DON'T HAVE TO.

Simple serviceability

Swing-out rear door enables easy, ground-level access to daily service checkpoints and cooling system components. If major component access is necessary, the ROPs can be tilted in less than five minutes.

Minimal maintenance

Redesigned Quik-Tatch system is optimized for effortless reach to grease zerks, minimizing maintenance time and expense.

Lightweight transport

With weights ranging from just 5,995 to 8,195 lb., G-Series machines are incredibly easy to trailer behind most standard pickup trucks.

Easier cooler cleanout

Hinged rear door and hydraulic cooler swing open, making trash removal and core cleanout easier.

Simplified checks

Color-coded handles and caps on conveniently positioned dipsticks and filler necks simplify checks and additions. See-through reservoirs and sight gauges let you see fuel, hydraulic oil, and windshield washer fluid levels at a glance.

Easy cleanup

If you're a neat freak or run a rental yard, you'll appreciate the convenient floor access that helps speed cleanout.

Quick changes

Spin-on remote-mounted engine oil and fuel filters allow quick no-mess changes. Extended service intervals reduce downtime for scheduled maintenance, too.

Handy boom tie-down

New integrated boom tie-down location enables easy access without having to crawl under the machine.

Engine	317G
Manufacturer and Model	Yanmar 4TNV86CHT
Non-Road Emission Standard	EPA Final Tier 4/EU Stage IV
Cylinders	4
Net Power (SAE J1349 / ISO 9249)	45.6 kW (61 hp) at 2,500 rpm
Gross Rated Power (ISO 14396)	48.5 kW (65 hp) at 2,600 rpm
Peak Torque	207 Nm (153 ftlb.) at 1,690 rpm
Displacement	2.1 L (128 cu. in.)
Rated Engine Speed	2,600 rpm
Torque Rise	16% at 1,690 rpm
Aspiration	Turbocharged
Air Cleaner	Dry dual element
Cooling	·
Fan Type	Direct belt drive
Powertrain	
Pump	Axial-piston hydrostatic
Motors	Axial-piston hydrostatic
Single Speed	11.3 km/h (7.0 mph)
Gearbox	High-drive double planetary reduction
Brakes	Integral, automatic, spring-applied, hydraulically released, wet-disc park brake
Undercarriage	
Rubber Tracks	Smooth-ride long-life rubber with steel inserts
Ground Pressure	
With Standard 320-mm (12.6 in.) Track	38 kPa (5.5 psi)
With Optional 400-mm (15.8 in.) Track	31 kPa (4.5 psi)
Track Rollers (per side)	4 triple-flange smooth-ride all-steel rollers
Track Idlers (per side)	1 double-flange and 1 single-flange smooth-ride all-steel rollers
Bearings/Seals (rollers/idlers)	Heavy-duty journal bearings and metal face seals
Tractive Effort	3632 kgf (8,000 lbf)
Hydraulics	
Туре	3-spool open-center valve
Pump Flow, Standard	59 L/m (16 gpm)
System Pressure at Couplers	23 787 kPa (3,450 psi)
Hydraulic Horsepower (calculated)	23 kW (31 hp)
Auxiliary Hydraulics	Optional connect-under-pressure with flat-faced couplers
Cylinders	
Stroke	351 mm (13.8 in.)
Electrical	
Number of Batteries	1
Reserve Capacity	150 min. standard / 180 min. optional
Alternator Rating	70 amp
Lights	
Standard	Halogen: 2 front and 1 rear
Deluxe (optional)	LED: 2 front, 2 side, and 1 rear
Operator's Station

TOGETHER.

THERE ARE NO SMALL JOBS. Every day you go the extra mile to reflect your high standards — and you need equipment that delivers. That's why every John Deere machine is designed and built to **exceed** all your efficiency, uptime, and profitability needs.

Together, we are better. Together, we are Deere.
